SUBJECT:

FairCom releases Linux Server[®]

CONTACT:

Tamra Brown,
FairCom Corporation (314) 445-6833

Columbia, MO May 16, 1995 —

FairCom Corporation has released the first commercial version of the FairCom Server[®] and SQL Server for Linux, a Unix-like operating system.

Linux, originally authored by Linus Torvalds in Finland, is an independent implementation of a superset of the POSIX specifications with which most versions of Unix comply.

Winston Atkisson, Senior Engineer at FairCom who implemented the Linux Server[®], said "We've already seen strong interest in the Linux

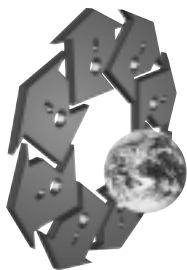

Server. Linux is quite robust yet very economical, with all the facilities of Unix, and capable of running software written for many different flavors of Unix that support the "ibcs" standard. FairCom's Linux Server offers true client/server architecture and heterogeneous network support.

Phil Hughes, publisher of Linux Journal magazine, explains "Linux is being recognized as a viable commercial platform; Linux runs on common PC hardware only better and faster than commercial UNIXes. FairCom's choice of porting their software to Linux shows their recognition of the viability of Linux."

The Linux Server is priced from

\$495 to \$2395, depending upon the number of users.

For more information contact FairCom at (800) 234-8180.
